EDUCATION

University of Guelph

Bachelor of Computing, Computer Science (Co-op), CGPA: 88.8%

Guelph, ON

Sept. 2022 – April 2027

EXPERIENCE

Software Developer

April 2025 – Aug. 2025

Magnet Forensics

Remote

- Helped maintain and implement features for regression suite using **Blazor**, **.NET**, and **Azure Pipelines** effectively progressing transition epic to **35%** which had an initial target of **20%**
- Improved regression tool performance by **15%** through continuous profiling, root cause analysis of slowdowns, and tool enhancements using **C#**
- Migrated and developed over **98%** of crucial product baseline cases through continuous product implementation refinement and refactoring of domain boundaries using **.NET**

Research Assistantship

Dec. 2024 – April 2025

University of Guelph, Engineering Department

Remote

- Designed and optimized algorithms using tools such as **pandas** to better serve **spatial data** to consumers
- Migrated from **ShinyJS** to **NextJS** in order to significantly reduce load times on average by **75%**
- Ensured functioning **on-premise services** and devised solutions to network and storage issues working with **Linux**, and **Docker containers**

Software Developer

Sept. 2024 – Dec. 2024

Magnet Forensics

Remote

- Architected and developed an **internal regression tool** in **.NET**, achieving over **91%** coverage of critical baseline test cases effectively ensuring product reliability
- Automated build and release processes using **Azure Pipelines**, reducing manual deployment effort and improving release consistency
- Strategized and implemented migration of code features from another platform using **C#** that ultimately helped product teams define domain boundaries and improve test coverage

Research Assistantship

April 2024 – Aug. 2024

University of Guelph, Engineering Department

Remote

- Collaborated in designing and optimizing a client-server architecture for a **Data-as-a-Service platform**, leveraging **PostgreSQL**, **Python**, and **RShiny** to improve scalability and performance
- Developed **CI/CD** pipelines using **Forgejo actions** to automate builds and releases, better streamlining development workflows
- Enabled global data delivery to over **155 countries** and processed more than **1700 requests** to date
- Initiated and implemented a test harness using Pytest, increasing overall code coverage to nearly **65%** by the end of the term

Web Developer

July 2023 – Aug. 2023

OneHSN

Remote

- Implemented UI-related features to enhance user experience and interface design using **ASP.NET**
- Seamlessly integrated **ZohoCRM** services into **MS Power Automate** using available API endpoints, automating sign up data flow into the company's **CRM** system

PROJECTS

Music Library | React.js, Redux.js, Express.js, PostgreSQL, Node.js, Framer-motion

Mar. 2023 – June 2023

- Developed a RESTful API with Express.js, efficiently handling authentication and database operations
- Used PostgreSQL for relational tables, simplifying retrieval, insertion, and migration processes for user and audio data

TECHNICAL SKILLS

Languages: C#, Python, Java, JavaScript/TypeScript, C, SQL (Postgres)

Frameworks: .NET, React.js, Next.js, Pytest

Developer Tools: Git, Docker, AWS, Azure, VS Code, Visual Studio
